

Phase 2: Requirement Analysis Phase

FUNCTIONAL REQUIREMENTS

- Real-time voice and text input processing.
- Contextual memory management for personalized interaction.
- Integration with essential productivity APIs (calendar, notes, reminders).

NON-FUNCTIONAL REQUIREMENTS

- Response time under 1 second for standard queries.
- End-to-end data encryption for user privacy.
- Minimal battery consumption and lightweight application size.

HARDWARE/SOFTWARE STACK

- **Frontend:** Mobile Framework (Flutter/React Native) or custom embedded UI.
- **Backend:** Lightweight AI models / API gateways (LLMs, STT, TTS models).
