

Phase 3: Project Design Phase

SYSTEM ARCHITECTURE

- Client-Server Architecture / Edge-AI architecture for local task execution.
- Secure API module communicating with AI inference services.

USER INTERFACE (UI) & USER EXPERIENCE (UX)

- Clean, minimal dark/light interface optimized for one-handed operation.
- Voice activation button and quick-action menu for daily tools.

DATABASE DESIGN

- Local encrypted database (e.g., SQLite/Realm) for local logs and user preferences.
