

PocketSmart AI: Your Smart Budget & Recommendation Assistant

AI / ML & GenAI Track

Field	Details
Team ID	SWTID-2026-3905
Team Size	4
Team Leader	Dhanush
Team Members	Agasten Y, Manikandan K, Thulothaman M

3. Project Design Phase: Solution Architecture

Data flow: the user works through the web interface, the backend processes requests, the ML model and LLM produce results, and the database stores the data.

Layer	Description	Technology
User Interface	Web pages to log expenses, set budgets, view reports and chat	HTML, CSS, JavaScript / Streamlit
Backend API	Handles requests, validation and application logic	Python (Flask / FastAPI)
ML Model	Auto-categorises expenses and generates recommendations	scikit-learn
GenAI Assistant	Answers budget questions in natural language	LLM API (Gemini / OpenAI)
Database	Stores users, expenses and budgets	SQLite / MySQL
Deployment	Hosting the application	Cloud / Local server
